JOURNAL OF ELECTROANALYTICAL CHEMISTRY

Subject index

Acetone
Infrared spectroscopy of model electrochemical interfaces in ultrahigh vacuum: coupled influence of double layer anion/cation solutes upon acetone solvent chemisorption on Pt(111) (Villegas, Weaver) 55
Adsorption
Growth of compact layers at the interface. Part VIII. Surface aggregation of α- and γ-cyclodextrins in aqueous solutions of potassium fluoride (Pospíšil, Švestka) 47
AFM
AFM and STM characterization of electrochemically modified electrodes based on a new Ni-dibenzotetraaza(14)annulene (Keita et al.) 191
Alkaline earth metal salts
Liquid junction potential between different solvents: a junction with an alkaline earth metal salt as electrolyte (Izutsu et al.) 91
Alkenes
Electrocatalytic oxidation of alkenes by water-soluble manganese porphyrins in aqueous media: a comparison of the reaction products at different oxidation states (Liu, Su) 197
Atomic force microscopy
Surface modification of platinum thin film electrodes towards a defined roughness and microporosity (Aschauer et al.) 157

BADTC
The electrochemical characteristics of an inorganic monolayer film modified gold electrode and its molecular recognition of alkali metal cation (Xu et al.) 139
Biosensor
Membrane-free, rhodium-modified, methyl silicate–graphite amperometric biosensor (Sampath, Lev) 131
Biosensors
Surface modification of platinum thin film electrodes towards a defined roughness and microporosity (Aschauer et al.) 157

Catalyst
Glassy carbon electrode modified by conductive, polymeric nickel(II) porphyrin complex as a 3D homogeneous catalytic system for methanol oxidation in basic media (Ciszewski, Milczarek) 125
Catalytic reduction of dioxygen
Electrocatalytic reduction of molecular oxygen using non-planar cobalt tetrakis-(4-sulfonatophenyl)-β-octabromoporphyrin (D'Souza et al.) 17
Charged interfaces
Comparison between charged, charged at the pzc and uncharged interfaces: a peculiar case related to the origin of the polarization catastrophe (Nikitas) 167
Chemisorption
Infrared spectroscopy of model electrochemical interfaces in ultrahigh vacuum: coupled influence of double layer anion/cation solutes upon acetone solvent chemisorption on Pt(111) (Villegas, Weaver) 55
Cobalt tetrakis-(4-sulfonatophenyl)-β-octabromoporphyrin
Electrocatalytic reduction of molecular oxygen using non-planar cobalt tetrakis-(4-sulfonatophenyl)-β-octabromoporphyrin (D'Souza et al.) 17
Condensed films
Growth of compact layers at the interface. Part VIII. Surface aggregation of α- and γ-cyclodextrins in aqueous solutions of potassium fluoride (Pospíšil, Švestka) 47
Conducting polymer electrodes
Electrocatalytic reduction of dioxygen at macrocycle conducting polymer electrodes in acid media (El Mouahid et al.) 117
Conduction
Effect of electropolymerization temperature on structural, morphological and conductive properties of poly(aniline) deposits prepared in 1,2-dichloroethane without a proton donor (Teshima et al.) 97
Cupric hexacyanoferrate
The electrochemical characteristics of an inorganic monolayer film modified gold electrode and its molecular recognition of alkali metal cation (Xu et al.) 139
Cyclic voltammetry
Surface modification of platinum thin film electrodes towards a defined roughness and microporosity (Aschauer et al.) 157
Cyclodextrins
Growth of compact layers at the interface. Part VIII. Surface aggregation of α- and γ-cyclodextrins in aqueous solutions of potassium fluoride (Pospíšil, Švestka) 47

D–A linked compound
A photoresponsive molecular assembly consisting of ruthenium(II) tris(2,2′-bipyridine)–viologen linked disulfide and hexadecanethiol prepared on a gold surface: effect of viologen moiety (Yamada et al.) 23
1,2-Dichloroethane
Effect of electropolymerization temperature on structural, morphological and conductive properties of poly(aniline) deposits prepared in 1,2-dichloroethane without a proton donor (Teshima et al.) 97

Electrocatalysis
High efficiency electrochemical reduction of N_2O on ZnO and In_2O_3 oxide semiconductor electrodes (Kudo, Mine) 1
Electrocatalytic reduction of molecular oxygen using non-planar cobalt tetrakis-(4-sulfonatophenyl)-β-octabromoporphyrin (D'Souza et al.) 17
Electrochemical oxidation
On some mechanistic aspects of the electrochemical oxidation of lactose at platinum and gold electrodes in alkaline medium (Druliolle et al.) 103
Electrochemical reactions
Two-dimensional infrared correlation analysis of electrochemical reactions (Osawa et al.) 11
Electrochemical reduction
High efficiency electrochemical reduction of N_2O on ZnO and In_2O_3 oxide semiconductor electrodes (Kudo, Mine) 1
Electronic conducting polymer
Voltammetric detection of NO in the rat brain with an electronic conducting polymer and Nafion® bilayer-coated carbon fibre electrode (Fabre et al.) 75

Electropolymerization
Effect of electropolymerization temperature on structural, morphological and conductive properties of poly(aniline) deposits prepared in 1,2-dichloroethane without a proton donor (Teshima et al.) 97

Ferrocene
Voltammetric studies of ferrocene and the mercury dithiophosphate system at mercury electrodes over a temperature range encompassing the mercury liquid–solid state transition (Bond et al.) 145
Freezing point of mercury
Voltammetric studies of ferrocene and the mercury dithiophosphate system at mercury electrodes over a temperature range encompassing the mercury liquid–solid state transition (Bond et al.) 145
Fullerene
Photoinduced electron transfer from porphyrin to C_{60} in a C_{60}| porphyrin double-layer photoelectrochemical cell (Takahashi et al.) 85

Glassy carbon electrode
Glassy carbon electrode modified by conductive, polymeric nickel(II) porphyrin complex as a 3D homogeneous catalytic system for methanol oxidation in basic media (Ciszewski, Milczarek) 125
Gold electrode
The electrochemical characteristics of an inorganic monolayer film modified gold electrode and its molecular recognition of alkali metal cation (Xu et al.) 139
Graphite
Membrane-free, rhodium-modified, methyl silicate–graphite amperometric biosensor (Sampath, Lev) 131

Heat generation
Hydrogen + oxygen recombination and related heat generation in undivided electrolysis cells (Will) 177
Heptylviologen
Two-dimensional infrared correlation analysis of electrochemical reactions (Osawa et al.) 11
Heteropolyanion
Voltammetric detection of NO in the rat brain with an electronic conducting polymer and Nafion® bilayer-coated carbon fibre electrode (Fabre et al.) 75
Hydrogen + oxygen recombination
Hydrogen + oxygen recombination and related heat generation in undivided electrolysis cells (Will) 177

Immiscible electrolyte solutions
Effect of the specific ion adsorption on the impedance of an interface between two immiscible electrolyte solutions (Samec) 31
Impedance
Effect of the specific ion adsorption on the impedance of an interface between two immiscible electrolyte solutions (Samec) 31
Impedance spectroscopy
Polarization phenomena at the water|*o*-nitrophenyl octyl ether interface. Part II. Role of the solvent viscosity in the kinetics of the tetraethylammonium ion transfer (Samec et al.) 37
Insecticides
Electrochemical reduction of pyrethroid insecticides in non-aqueous solvents (Coomber et al.) 63
Interface
Effect of the specific ion adsorption on the impedance of an interface between two immiscible electrolyte solutions (Samec) 31
Interface modelling
Infrared spectroscopy of model electrochemical interfaces in ultrahigh vacuum: coupled influence of double layer anion/cation solutes upon acetone solvent chemisorption on Pt(111) (Villegas, Weaver) 55
Interfaces charged at the pzc
Comparison between charged, charged at the pzc and uncharged interfaces: a peculiar case related to the origin of the polarization catastrophe (Nikitas) 167

Ion adsorption
Effect of the specific ion adsorption on the impedance of an interface between two immiscible electrolyte solutions (Samec) 31
Ion transfer
A model for ion transfer through liquid|liquid interfaces (Schmickler) 5
Polarization phenomena at the water|*o*-nitrophenyl octyl ether interface. Part II. Role of the solvent viscosity in the kinetics of the tetraethylammonium ion transfer (Samec et al.) 37
IR reflectance spectroscopy
On some mechanistic aspects of the electrochemical oxidation of lactose at platinum and gold electrodes in alkaline medium (Druliolle et al.) 103

Kinetics
Polarization phenomena at the water|*o*-nitrophenyl octyl ether interface. Part II. Role of the solvent viscosity in the kinetics of the tetraethylammonium ion transfer (Samec et al.) 37

Lactose
On some mechanistic aspects of the electrochemical oxidation of lactose at platinum and gold electrodes in alkaline medium (Druliolle et al.) 103
Laser-induced fluorescence spectroscopy
Laser spectroelectrochemistry of α,β,γ,δ-tetra-(4-trimethyl ammonium phenyl) porphyrin (Hu et al.) 185
Laser-secondary-neutral-mass-spectroscopy
Surface modification of platinum thin film electrodes towards a defined roughness and microporosity (Aschauer et al.) 157
Laser spectroelectrochemistry
Laser spectroelectrochemistry of α,β,γ,δ-tetra-(4-trimethyl ammonium phenyl) porphyrin (Hu et al.) 185
Lattice-gas model
A model for ion transfer through liquid|liquid interfaces (Schmickler) 5
Liquid junction potential
Liquid junction potential between different solvents: a junction with an alkaline earth metal salt as electrolyte (Izutsu et al.) 91
Liquid|liquid interfaces
A model for ion transfer through liquid|liquid interfaces (Schmickler) 5

Macrocycles
Electrocatalytic reduction of dioxygen at macrocycle conducting polymer electrodes in acid media (El Mouahid et al.) 117
Manganese porphyrins
Electrocatalytic oxidation of alkenes by water-soluble manganese porphyrins in aqueous media: a comparison of the reaction products at different oxidation states (Liu, Su) 197
Mathematical analysis
Hydrogen + oxygen recombination and related heat generation in undivided electrolysis cells (Will) 177
Membrane-free sensor
Membrane-free, rhodium-modified, methyl silicate–graphite amperometric biosensor (Sampath, Lev) 131
Mercury dithiophosphate
Voltammetric studies of ferrocene and the mercury dithiophosphate system at mercury electrodes over a temperature range encompassing the mercury liquid–solid state transition (Bond et al.) 145
Mercury electrode
Voltammetric studies of ferrocene and the mercury dithiophosphate system at mercury electrodes over a temperature range encompassing the mercury liquid–solid state transition (Bond et al.) 145
Methanol
Glassy carbon electrode modified by conductive, polymeric nickel(II) porphyrin complex as a 3D homogeneous catalytic system for methanol oxidation in basic media (Ciszewski, Milczarek) 125

Methyl silicate
Membrane-free, rhodium-modified, methyl silicate–graphite amperometric biosensor (Sampath, Lev) 131
Modelling
A model for ion transfer through liquid|liquid interfaces (Schmickler) 5
Modified electrode
Voltammetric detection of NO in the rat brain with an electronic conducting polymer and Nafion® bilayer-coated carbon fibre electrode (Fabre et al.) 75
Monolayer
A photoresponsive molecular assembly consisting of ruthenium(II) tris(2,2′-bipyridine)–viologen linked disulfide and hexadecanethiol prepared on a gold surface: effect of viologen moiety (Yamada et al.) 23
Morphology
Effect of electropolymerization temperature on structural, morphological and conductive properties of poly(aniline) deposits prepared in 1,2-dichloroethane without a proton donor (Teshima et al.) 97

Nickel(II) porphyrin
Glassy carbon electrode modified by conductive, polymeric nickel(II) porphyrin complex as a 3D homogeneous catalytic system for methanol oxidation in basic media (Ciszewski, Milczarek) 125
Ni-dibenzotetraaza(14)annulene
AFM and STM characterization of electrochemically modified electrodes based on a new Ni-dibenzotetraaza(14)annulene (Keita et al.) 191
Nitric oxide
Voltammetric detection of NO in the rat brain with an electronic conducting polymer and Nafion® bilayer-coated carbon fibre electrode (Fabre et al.) 75
Nitrogen oxide
High efficiency electrochemical reduction of N_2O on ZnO and In_2O_3 oxide semiconductor electrodes (Kudo, Mine) 1
Noble metal electrodes
On some mechanistic aspects of the electrochemical oxidation of lactose at platinum and gold electrodes in alkaline medium (Druliolle et al.) 103
Non-planar porphyrins
Electrocatalytic reduction of molecular oxygen using non-planar cobalt tetrakis-(4-sulfonatophenyl)-β-octabromoporphyrin (D'Souza et al.) 17
Nucleation
Growth of compact layers at the interface. Part VIII. Surface aggregation of α- and γ-cyclodextrins in aqueous solutions of potassium fluoride (Pospíšil, Švestka) 47

Oxidation
Glassy carbon electrode modified by conductive, polymeric nickel(II) porphyrin complex as a 3D homogeneous catalytic system for methanol oxidation in basic media (Ciszewski, Milczarek) 125
Electrocatalytic oxidation of alkenes by water-soluble manganese porphyrins in aqueous media: a comparison of the reaction products at different oxidation states (Liu, Su) 197
Oxide electrode
High efficiency electrochemical reduction of N_2O on ZnO and In_2O_3 oxide semiconductor electrodes (Kudo, Mine) 1
Oxygen electroreduction
Electrocatalytic reduction of dioxygen at macrocycle conducting polymer electrodes in acid media (El Mouahid et al.) 117

Photocurrent
A photoresponsive molecular assembly consisting of ruthenium(II) tris(2,2′-bipyridine)–viologen linked disulfide and hexadecanethiol prepared on a gold surface: effect of viologen moiety (Yamada et al.) 23
Photoelectrochemical cell
Photoinduced electron transfer from porphyrin to C_{60} in a C_{60}|porphyrin double-layer photoelectrochemical cell (Takahashi et al.) 85
Photosensitizer
Photoinduced electron transfer from porphyrin to C_{60} in a C_{60}|porphyrin double-layer photoelectrochemical cell (Takahashi et al.) 85
Platinum
Infrared spectroscopy of model electrochemical interfaces in ultrahigh vacuum: coupled influence of double layer anion/cation solutes upon acetone solvent chemisorption on Pt(111) (Villegas, Weaver) 55
Platinum hexacyanoferrate
Platinum hexacyanoferrate: a novel Prussian Blue analogue with stable electroactive properties (Liu et al.) 27
Platinum thin film electrodes
Surface modification of platinum thin film electrodes towards a defined roughness and microporosity (Aschauer et al.) 157
Polarization catastrophe
Comparison between charged, charged at the pzc and uncharged interfaces: a peculiar case related to the origin of the polarization catastrophe (Nikitas) 167
Poly(aniline)
Effect of electropolymerization temperature on structural, morphological and conductive properties of poly(aniline) deposits prepared in 1,2-dichloroethane without a proton donor (Teshima et al.) 97
Porous network
Membrane-free, rhodium-modified, methyl silicate–graphite amperometric biosensor (Sampath, Lev) 131
Porphyrin
Photoinduced electron transfer from porphyrin to C_{60} in a C_{60}|porphyrin double-layer photoelectrochemical cell (Takahashi et al.) 85
Proton donor
Effect of electropolymerization temperature on structural, morphological and conductive properties of poly(aniline) deposits prepared in 1,2-dichloroethane without a proton donor (Teshima et al.) 97
Prussian Blue analogue
Platinum hexacyanoferrate: a novel Prussian Blue analogue with stable electroactive properties (Liu et al.) 27
Pyrethrins
Electrochemical reduction of pyrethroid insecticides in non-aqueous solvents (Coomber et al.) 63

Reaction products
Electrocatalytic oxidation of alkenes by water-soluble manganese porphyrins in aqueous media: a comparison of the reaction products at different oxidation states (Liu, Su) 197
Reduction
Electrochemical reduction of pyrethroid insecticides in non-aqueous solvents (Coomber et al.) 63
Laser spectroelectrochemistry of α,β,γ,δ-tetra-(4-trimethyl ammonium phenyl) porphyrin (Hu et al.) 185
Rhodium
Membrane-free, rhodium-modified, methyl silicate–graphite amperometric biosensor (Sampath, Lev) 131
Roughness
Surface modification of platinum thin film electrodes towards a defined roughness and microporosity (Aschauer et al.) 157
Ruthenium polypyridine complex
A photoresponsive molecular assembly consisting of ruthenium(II) tris(2,2′-bipyridine)–viologen linked disulfide and hexadecanethiol prepared on a gold surface: effect of viologen moiety (Yamada et al.) 23

Self-assembly
A photoresponsive molecular assembly consisting of ruthenium(II) tris(2,2′-bipyridine)–viologen linked disulfide and hexadecanethiol prepared on a gold surface: effect of viologen moiety (Yamada et al.) 23
The electrochemical characteristics of an inorganic monolayer film modified gold electrode and its molecular recognition of alkali metal cation (Xu et al.) 139
Semi-thermodynamics
Comparison between charged, charged at the pzc and uncharged interfaces: a peculiar case related to the origin of the polarization catastrophe (Nikitas) 167
Solvent
Infrared spectroscopy of model electrochemical interfaces in ultrahigh vacuum: coupled influence of double layer anion/cation solutes upon acetone solvent chemisorption on Pt(111) (Villegas, Weaver) 55
Liquid junction potential between different solvents: a junction with an alkaline earth metal salt as electrolyte (Izutsu et al.) 91
Solvent viscosity
Polarization phenomena at the water|*o*-nitrophenyl octyl ether interface. Part II. Role of the solvent viscosity in the kinetics of the tetraethylammonium ion transfer (Samec et al.) 37
STM
AFM and STM characterization of electrochemically modified electrodes based on a new Ni-dibenzotetraaza(14)annulene (Keita et al.) 191
Structure
Effect of electropolymerization temperature on structural, morphological and conductive properties of poly(aniline) deposits prepared in 1,2-dichloroethane without a proton donor (Teshima et al.) 97
Surface-enhanced infrared absorption spectroscopy
Two-dimensional infrared correlation analysis of electrochemical reactions (Osawa et al.) 11
Surface-enhanced resonance Raman spectroscopy
Laser spectroelectrochemistry of α,β,γ,δ-tetra-(4-trimethyl ammonium phenyl) porphyrin (Hu et al.) 185
Surface modification
Surface modification of platinum thin film electrodes towards a defined roughness and microporosity (Aschauer et al.) 157
Tetraethylammonium ion
Polarization phenomena at the water|*o*-nitrophenyl octyl ether interface. Part II. Role of the solvent viscosity in the kinetics of the tetraethylammonium ion transfer (Samec et al.) 37
Time-resolved infrared spectroscopy
Two-dimensional infrared correlation analysis of electrochemical reactions (Osawa et al.) 11
α,β,γ,δ-tetra-(4-Trimethyl ammonium phenyl) porphyrin
Laser spectroelectrochemistry of α,β,γ,δ-tetra-(4-trimethyl ammonium phenyl) porphyrin (Hu et al.) 185
Two-dimensional infrared correlation spectroscopy
Two-dimensional infrared correlation analysis of electrochemical reactions (Osawa et al.) 11

UHV
Infrared spectroscopy of model electrochemical interfaces in ultrahigh vacuum: coupled influence of double layer anion/cation solutes upon acetone solvent chemisorption on Pt(111) (Villegas, Weaver) 55
Uncharged interfaces
Comparison between charged, charged at the pzc and uncharged interfaces: a peculiar case related to the origin of the polarization catastrophe (Nikitas) 167
Undivided electrolysis cell
Hydrogen + oxygen recombination and related heat generation in undivided electrolysis cells (Will) 177

Viologen
A photoresponsive molecular assembly consisting of ruthenium(II) tris(2,2′-bipyridine)–viologen linked disulfide and hexadecanethiol prepared on a gold surface: effect of viologen moiety (Yamada et al.) 23
Voltammetry
Platinum hexacyanoferrate: a novel Prussian Blue analogue with stable electroactive properties (Liu et al.) 27
Voltammetric studies of ferrocene and the mercury dithiophosphate system at mercury electrodes over a temperature range encompassing the mercury liquid–solid state transition (Bond et al.) 145
